Not all of the given AI A and HPAI A statuses of one and the same region can be combined. List of both AI A and HPAI A status pairs, which can be attributed to the same region, is given in the following Table.

*Statuses in the descending order of disease freedom level:*

«AI A free without vaccination»,

«AI A free with vaccination»,

«AI A unknown without vaccination»,

«AI A unknown with vaccination»,

«AI A infected without vaccination»,

«AI A infected with vaccination»,

«HPAI A free without vaccination»,

«HPAI A free with vaccination»,

«HPAI A unknown without vaccination»,

«HPAI A unknown with vaccination»,

«HPAI A infected without vaccination»,

«HPAI A infected with vaccination».

[illegible]

«HPAI A free with vaccination»												
«HPAI A unknown without vaccination»												
«HPAI A unknown with vaccination»												
«HPAI A infected without vaccination»												
«HPAI A infected with vaccination»												

**Notes:**

Green boxes – admissible status combinations,

Red boxes – non-admissible status combinations,

Black boxes – the same status.
